EDUCATION

Anil Neerukonda Institute of Technology and Sciences

Visakhapatnam, India

Bachelor of Technology, Computer Science and Engineering

Sep 2023 – Present CGPA: 8.83 / 10.0

EXPERIENCE

Unisoft Agency (Remote) | Full Stack Developer Intern

Jan 2025 – Mar 2025

- Developed and deployed a real-time debate platform enabling multi-room discussions and live participant interaction using React.js, Node.js, Express.js, and Socket.io.
- Implemented scalable WebSocket-based communication architecture for instant messaging, room synchronization, and real-time event handling.
- Designed secure REST APIs and integrated JWT for user session management and protected routes.
- Optimized frontend responsiveness and collaborated using Git/GitHub workflows, modular coding practices, and Postman API testing.

PROJECTS

FedEx DCA Control Tower

GitHub | Live Demo

Next.js 14, TypeScript, Supabase PostgreSQL, FastAPI, Tailwind CSS

Enterprise-grade governance platform for managing outsourced debt collection operations across multiple agencies, regions, and organizational hierarchies with automated allocation and SLA tracking.

- Implemented automated DCA allocation using weighted scoring based on SLA compliance, recovery rate, and capacity utilization.
- Designed secure RBAC architecture with JWT, MFA enforcement, and Row-Level Security (RLS).
- Built SLA breach detection, audit logging, and real-time dashboards for operational monitoring and compliance tracking.

SmartCart AI – AI Shopping Assistant

GitHub | Live Demo

React.js, Tailwind CSS, LLM APIs

Conversational shopping assistant that helps users compare products, discover relevant options, and make purchase decisions from natural-language prompts.

- Built an AI-powered shopping assistant using LLM APIs for intelligent product recommendations.
- Optimized React state management and responsive UI, reducing unnecessary re-renders by 40%.

Roameo – AI Travel Itinerary Generator

GitHub | Live Demo

React.js, Supabase, Gemini API, Groq API

AI travel planning application that creates destination-specific itineraries by combining user preferences, trip duration, and budget constraints.

- Built a full-stack AI travel planner generating personalized itineraries with budget-aware recommendations.
- Implemented modular frontend architecture, dynamic routing, and Supabase backend integration.

ACHIEVEMENTS & LEADERSHIP

- Participated in Tata Elxsi Hackathon, 24-Hour Hackathon (GVP), and VoyageHack 3.0.
- Qualified to Semi-Finals in Smart India Hackathon (SIH), FedEx SIH by IIT Madras.

TECH STACK

Languages

C, C++, Python, JavaScript (ES6+), SQL

Frontend

React.js, HTML5, CSS3, Tailwind CSS

Backend

Node.js, Express.js, REST APIs, JWT Authentication

Databases

MySQL, MongoDB, PostgreSQL, Supabase

Tools & Platforms

Git, GitHub, Postman, Vercel, Render, VS Code, Google Colab

Core Skills

DSA, Problem Solving, Team Collaboration, Adaptability
